

A Math Skills Update is available for each child. Print the update for the grade your child(ren) will be entering. For example, if your child is going into second grade, you will print of all of the pages of the Skills Update for second grade. This will provide your child with practice for the skills presented to them during the previous school year. To print the Skills Update:

- Go to <http://www.sadlier-oxford.com/>
- Click on Mathematics
- Click on Student Center
- Choose the correct grade level
 - Note: Incoming seventh graders are to choose Fundamentals of Algebra
 - Incoming eighth graders are to choose Foundations of Algebra
- Click on Skills Update
- Print each practice page
 - Note: Many of the grade levels have lessons available before the practice to allow the students to review if necessary.

Help your child pace his or her work; plan on completing a few pages each week of summer vacation.

As your child finishes each page, please date and initial it. It would also be helpful to note any areas of difficulty your child experiences during the practice completion. This will make the teacher aware of areas that require will review.

When the Skills Update is complete, please staple or clip all of the pages together. Be sure to include your child's full name and incoming grade on the first page of the review. Skill workbooks are due on **Tuesday, September 1, 2009.**

If you have any difficulty accessing the site, please contact me, and I will provide you with assistance.

Have a blessed and safe summer,

Mary Leve
